- ▶ Booking
- ▶ Reaccommodation
- ▶ Check-in
- ▶ Status
- ▶ Schedules
- ▶ My Itineraries
- ▶ Weather
- ▶ TSA Wait Time
- ▶ Travel Content
- ▶ Etc.

Introduction:

GTT has provided wireless solutions since 1999 and currently provides a best of breed / state of the art wireless distribution solution.

Tech specs:

We call our wireless application oneURL because, in addition to correctly recognizing all prior and new phone devices, it is fully RSS 2.0 audio visual compatible. This means GTT's solution is designed to treat any URL as a platform and thus can publish your content to Widgets, Instant Messages and virtually anywhere that accesses an URL and optimizes the display for the platform: hence 'oneURL'.
