

Screensaver

Dramatically display your network

Introduction

The GTT screensaver visually displays the power of your route network with actual scheduled flights moving through a 24 hour sequence.

Static

The static mode randomly displays the city pair and flight number of currently scheduled flights

Dynamic

The dynamic mode displays all currently scheduled flights in 10 minute increments during the current 24 hour period.

Screensaver Options Include

- ▶ Dynamic display of flights from random origins
- ▶ Flight Status with route
- ▶ Display of lowest fares with route

Screensaver Application

The screensaver displays on a fully customized map differentiating night and day; where the day/night arc changes by time of year.

The screensaver is dynamically updated to contain your latest flights.
